

City Post[®] SM

Ultra-High Impact Resistance in a Surface Mount Channelizer

“Creating Products to Save Lives”

The Durability of Pexco's One-Piece City Post® SM Makes It the Best Choice for Challenging Installations

City Post® SM Surface Mount

Meet the newest member of our City Post family!

The City Post SM surface-mount uses the same materials as our original spin-in City Post to create an ultra-high impact-resistant bolt-down channelizer with superior strength and durability.

The City Post SM remains flexible, even at extremely high and low temperatures, and returns to a full upright position even after 100 impacts at 60 mph (100 km/h).

Use the City Post SM on roads where high durability and minimal

maintenance is needed but coring for an anchor is impractical or undesirable. Reusable anchor bolts allow for posts to be replaced quickly and simply.

Testing and Certificates:

TTI - 100 impact NTPEP test at 60 mph / 100 km/h

- less than 3 degrees off vertical
- not a single failure

EN 13422 Certified

EM 12767 Certified

NCHRP 350 Accepted

MUTCD Compliant

Protection of impact attenuators at frequent impact locations

City Posts rebound to vertical, even after 100 hits at 60 mph

Separation of merging lanes on freeway off-ramps
