

LXL Series Hydraulic Slide Gate Operators

- More secure than chain-drive units
- Low maintenance, self contained hydraulic system with minimal wear items
- UL 325 Compliant, ETL Listed
- Safe 24VAC/24VDC controls standard
- Drive rail increases rigidity of gate panel
- Continuous duty operation
- Hand release for manual operation
- Built-in maximum run timer and timer to close
- On board 3 button control station
- On board LCD display for programming, setting of parameters and diagnostics
- Rack and pinion drive (on 'R' models)
- True battery back-up (on 'B' models)
- Remote Ethernet control option available

Reliable Perimeter Security Solutions

B&B ARMOR's LXL Series Hydraulic Slide Gate Operators are designed for consistent and dependable operation of all styles of sliding gates in a variety of high cycle applications. Ideally suited for highly sensitive commercial and industrial facilities, these operators are easily adaptable to lower risk establishments such as gated communities, small businesses, and even private residences.

Because of their self contained hydraulic design, the LXL Series Operators do not require the constant maintenance typical of units with chains, sprockets, belts, or pulleys.

Customizable with a wide range of control options, the LXL Series provides custom solutions for virtually any facility type or environmental condition. Typical options include battery back-up, loop detectors, radio control, card readers, and various safety devices. Because of their wide range of capabilities, these versatile

operators have been trusted to secure facilities for decades.

The LXL Series Operators are capable of actuating gates of all sizes. The rack and pinion models provide an ideal solution for snowy and icy environments where drive wheel traction could be an issue.

All LXL Series Hydraulic Slide Gate Operators are backed by a five-year limited manufacturer's warranty and industry leading customer service.

B&B ARMOR specializes in the design and manufacturing of high quality gate operators and crash rated perimeter security equipment.
