

PARKING SOLUTIONS

ENTRY AND EXIT STATIONS

MP-60

Entry Station

- High-speed ticket issuance for fast vehicle throughput
- Up to 5,000 tickets in one paper roll

APS-60

Pay-On-Foot Station

- Easy installation in small spaces
- Highly versatile, customizable and user-friendly

SW-60

Exit Station

- Receipt printing on demand
- In-lane ticket processing and pay station for high throughput

SMARTPARK

Monitoring, control and reporting

Revenue management

Validation solutions

Access control

Debit and value card

Tenant management

LICENSE PLATE RECOGNITION

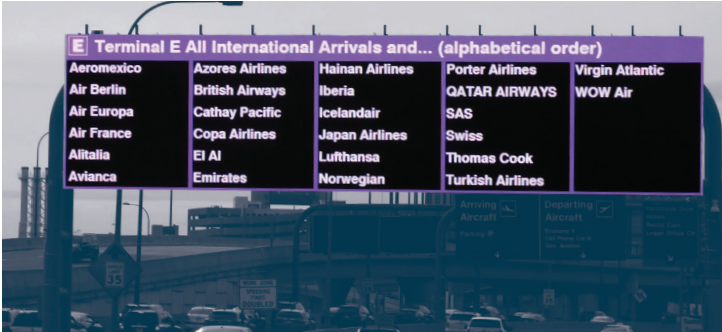

- Greater security
- Increased revenue collection
- Increased traffic throughput
- Determine exact duration of visit
- Enhanced customer management
- Reduced CO₂ in garage

PARKING GUIDANCE

PARKING AVAILABILITY

DYNAMIC MESSAGING

Adaptive Dynamic Message Signs from TAPCO capture attention with customizable imagery, text and video. All signs are simple to configure and designed for durability, energy efficiency and reader comprehension:

- Lightweight, easy-access doors facilitate quick and convenient maintenance
- Offering flexibility in I/O type, eliminating the need for custom hardware alignment

BLANK-OUT SIGNS

Blank-out signs are available in a tremendous variety, including single and multi-level space availability tower signs; highway toll plaza and weight station signs; FHWA, MUTCD, regulatory and warning signs; traffic controller signals and LED parking and warning safety signs. All signs can feature:

- Custom messages, sizes and cabinet colors
- Ground or ceiling mounting

PARKING METERS

SINGLE-SPACE

These parking meters feature a lithium-ion rechargeable battery and are cellular, WiFi and Bluetooth capable. Also available are:

- ADA-compliant options
- Integrated dome sensors

MULTI-SPACE

These parking meters are designed for outdoor and unattended environments, and they feature:

- Customizable, multi-use kiosk
- Solar-powered, full-color display screen

PREVENTATIVE MAINTENANCE SERVICE CONTRACTS

Preventative maintenance service contracts provide customers with the peace of mind that trained TAPCO technicians are actively servicing systems and always on call in case the unexpected occurs. From simple maintenance checks to complex controller testing, every contract is customized based on your community's systems, labor and budgetary needs.

PARKING STRUCTURE AND LOT

GATE OPERATORS

MICRODRIVE GATE

- Fast opening times
- Long life cycle
- Reliable and durable
- Extremely low operational costs
- Easy handling
- Minimal maintenance required

SLIDE AND SWING GATE

- Automatic magnetic limits and lock power
- Built-in electronic reverse system and power and alarm reset switches
- Special anti-tailgating and partial open features
- Overlap feature for bi-parting swing gate operation
- Battery backup available

PREFAB BUILDINGS

DURASTEEL THREE-SIDED SHELTER

- Built-in strength, durability, security and aesthetics
- Protects workers and attendants from all weather conditions

DURASTEEL SECURITY BUILDING

- Steel strength ensures long-lasting durability and security
- Seamless design and construction maximize visual appeal

DURALUMINUM SECURITY BUILDING

- Maintenance-free, low-cost alternative to steel
- Anodized aluminum eliminates rusting and deterioration

SAVE MONEY AND TIME WITH OMNIA PARTNERS AND TAPCO

OMNIA
PARTNERS

Did you know we offer exclusive discount pricing through our competitively solicited OMNIA Partners contract? Participating government and non-profit agencies that purchase direct from the contract receive the lowest available price on our entire product offering.

SAFETY ENHANCEMENTS

Design a safe, seamless parking experience for your visitors and increase the reliability and revenue of your facility with TAPCO's safety enhancement options.

From everyday products - such as parking podiums, cable covers and cameras, just to name a few -- to more comprehensive solutions, the TAPCO portfolio has the safety enhancement you're looking for.

PARKING CONFLICT

TAPCO's parking solutions can be designed for all parking situations and improve parking by:

- Reducing conflict between two or more vehicles, as well as vehicles and pedestrians
- Increasing the efficient flow of vehicles in and out

PEDESTRIAN CROSSWALK

TAPCO Pedestrian Crosswalk Systems are built to MUTCD standards and customized to customer needs, helping parking facilities by:

- Providing the flexibility to adapt to any configuration
- Heightening driver awareness

OVERHEIGHT WARNING

TAPCO Overheight Warning Systems provide parking facilities their best chance to avoid potential budget-destroying, low-structure collisions by:

- Detecting overheight vehicles
- Alerting drivers to an impending collision

DRIVER FEEDBACK

Driver feedback signs capture and display the speed of the vehicle traveling in its direction. Available in a size, color and power source to fit every parking application, they increase safety by:

- Improving speed awareness
- Slowing driver speeds

CLEARANCE BARS

Clearance bars lower your liability costs by preventing damage to your structure. Available in different lengths and colors, they are designed to last by:

- Resisting fades and impacts
- Withstanding all weather conditions

BLINKERSTOP®

TAPCO BlinkerStop® LED STOP Signs provide greater stop sign awareness, reducing blow-throughs. They combine flashing perimeter LEDs and 3M DG³ reflective sheeting, thereby:

- Creating highly visible signage
- Increasing driver compliance
