4G TIME CLOCK RETROFIT SYSTEM

TAPCO's 4G Time Clock controllers allow for easy remote scheduling and management of time-critical warning systems through BlinkLink®.

TAPCO's 4G Time Clock Retrofit System easily replaces old, 3rd party, manual time clock systems, enabling operators to upgrade control capabilities while still using their existing cabinet and warning system.

KEY BENEFITS

- Access and schedule warning systems through any web-enabled device
- Intuitive, interactive dashboard with map view of deployed systems
- Easily program and view the status of every system, including system health and diagnostics
- Remotely override the schedule to turn the warning systems on or off
- Works in both AC and DC/solar powered systems
- Fast, reliable 4G network
- Monitor status of beacon(s) with Light Out feature (optional, new TAPCO systems only)
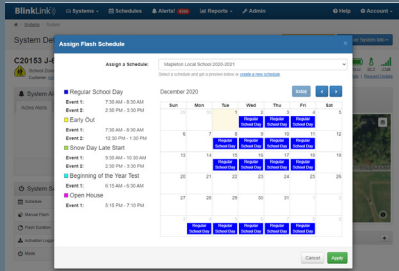

Outdated Time Clock System

TAPCO Web-Enabled Time Clock

BlinkLink™))

BlinkLink®, powered by TAPCO, is an easy-to-use, cloud-based event management software.

MULTI-SCHEDULING CALENDAR FUNCTIONS

- Complete calendar schedule system with up to 8 different day types, and 16 events per day for flexible application.
- Apply schedules to multiple devices at once with the click of a mouse.

MONITOR, MANAGE AND REPORT FROM ANYWHERE

- Receive alerts, program, or view system status from any web-enabled device.
- No need to visit the location to change schedules.

TAPCO Systems Shown.

SPECIFICATIONS

POWER	Hybrid 120VAC or 12VDC available
PROGRAM ACTIVATION OPTIONS	24/7, BlinkLink® Scheduling, Time Clock
HARNESS	8 Pin hybrid 120VAC or 12VDC compatible
ANTENNA	Weather proof cellular 4G LTE antenna
ENCLOSURE	Powder-coated aluminum
ENCLOSURE DIMENSIONS	4.4"W x 8.3"H x 1.9"D
