INTELLIGENT WARNING SYSTEM MONITORING FOR SMART CITY INFRASTRUCTURE

BlinkLink®, powered by TAPCO, is an easy-to-use, cloud-based event management software accessible from any web-enabled device.

Configurable to meet the needs of any school, BlinkLink® enables authorized personnel to remotely program and schedule school zone alert systems, collect real-time data and receive voice, email and SMS notifications.
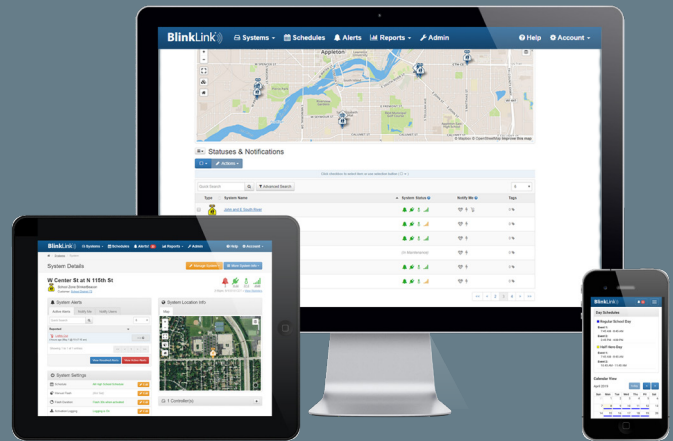

KEY BENEFITS

- Generate custom activation reports and analyze trends
- Monitor sites via an interactive dashboard with a map view and streaming
- Remotely schedule up to 16 active time periods per day for up to two years
- Remotely override the system/schedule to turn the warning alerts on or off
- Monitor status of beacon(s) with Lights Out feature
- Program, view the status of every system and livestream with enhanced BlinkLink®
  *camera and other equipment needed

MONITOR, SCHEDULE, MANAGE AND REPORT FROM ANYWHERE

USE MULTI-SCHEDULING CALENDAR FUNCTIONS

Quickly Monitor Intelligent Warning Systems

BlinkLink® lets you easily monitor the status of every TAPCO Intelligent Warning System from its interactive map view, gather historical device data and quickly access individual systems through the search and filter function.

Receive Email and SMS Notifications

Receive immediate voice, email or SMS alert notifications when a traffic emergency occurs or traffic device maintenance is needed. Determine what traffic events and health performance indicators trigger notifications. Keep everyone informed by tailoring notification recipients, such as operators, authorities and maintenance contractors.

Custom Reporting

Generate custom reporting for each device's historical data. Analyze event-related data to establish lessons learned for future best practice implementation. Alert notification data collects when notifications are sent out and who received them.
