

FACILITY INTERSECTION CONFLICT WARNING SYSTEM (FICWS)

Reduce dangerous conflicts between foot traffic, forklifts and other mobile equipment in your facility by alerting pedestrians and equipment operators to the movement of one another.

- Designed for indoor applications
- Multiple passive detection options
- Wired and wireless radio communication options available
- Ability to differentiate pedestrians and mobile equipment
- Modular system design for various pathway configurations
- 120 to 240VAC acceptable power range
- Ability to detect a wide range of movement speeds
- Custom sign faces available
- Comes with three-year warranty

MOUNTING OPTIONS

CEILING MOUNT

WALL MOUNT

WAREHOUSE RACK MOUNT

RADAR DETECTION

Housed in a rugged NEMA 4 / IP65-rated enclosure, radar sensors provide motion detection, even in harsh settings.

- Microwave Doppler radar detection, directional detection and alerting options available
- Remote control programming for quick adjustments from the floor

COMMUNICATION

Both wired and wireless communication are available. With wireless communication, you get:

- A range of up to 900 feet
- Reduced wiring to limit obstruction of vehicle movement and/or operations
- The ability to trigger multiple warning alerts from one detection sensor activation input

LED-ENHANCED WARNING ALERT OPTIONS

Alerts include BlinkerSign® LED-Enhanced Signs, BlinkerBeacon™ LED Beacons and rectangular rapid-flashing beacons (RRFBs).
