INTELLIGENT WARNING SYSTEM MONITORING FOR SMART CITY INFRASTRUCTURE

BlinkLink®, powered by TAPCO, is an easy-to-use, event management software accessible from any web-enabled device.
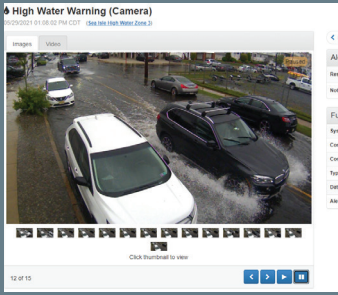

Configurable to meet the needs of any agency, BlinkLink® enables authorized personnel to remotely monitor and manage high water warning systems, collect real-time data and receive voice, email and SMS notifications.

KEY BENEFITS

- Receive incident notifications via cellular or fiber networks
- Detect and prioritize high water incidents for rapid remediation
- View incident details via color images, video and local system streaming
    - With optional camera and enhanced BlinkLink®
- Monitor sites via an interactive dashboard with a map view
- Remotely monitor system health diagnostics and integrate with third-party software systems

BlinkLink™))
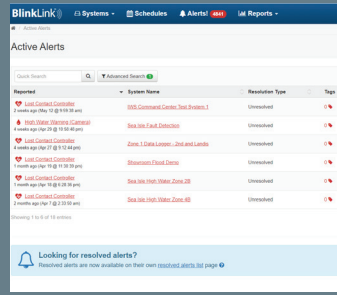

ROAD MAY FLOOD

ROAD MAY FLOOD

NOTIFY

Keep your whole team informed when flooded roads are detected by receiving alert notifications with minimal latency.
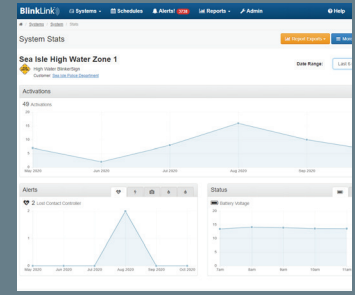

MONITOR

Easily program and view the status of every TAPCO High Water Warning System from the interactive map view and gather historical data.

MANAGE

Eliminate time-consuming site visits by remotely managing each system anywhere, on any web-enabled device.

REPORT

Configure reporting parameters to develop a holistic view of your system's activity and facilitate the implementation of best practices based on actionable data.

QUICKLY MONITOR INTELLIGENT WARNING SYSTEMS

Easily monitor the status of every TAPCO Intelligent Warning System from the interactive map view, gather historical device data and quickly access individual systems through the search and filter function.

RECEIVE EMAIL AND SMS ALERTS

Receive immediate voice, email or SMS alert notifications when a traffic emergency occurs or traffic device maintenance is needed. Determine what traffic events and health performance indicators trigger notifications. Keep everyone informed by tailoring notification recipients, such as operators, authorities and maintenance contractors.

CUSTOM REPORTING

Generate custom reporting for each device's historical data. Analyze event-related data to establish lessons learned for future best practice implementation. Collect data about when notifications are sent out and who received them.
