Predictive Mobility

Transforming transportation where rail meets the road!

Predictive Mobility! Advance notification keeps Rail Traffic from meeting Road Traffic for Communities with Freight Rail.

97% — of citizens experience delays in past 30 days.

85% — Have been late for school, work or appointment.

**60%** — Experience delays over 20 minute.

$300B — Impact on US economy.

👎 — Navigation Programs don't have blocked crossing data.

👎 — Bridges can only be used at small percentage of crossings.

Grade Separation + Predictive Mobility = 100% Success!

👍 Typically, grade separation alone can't solve problems for all crossings in a corridor.

👍 Predictive Mobility can typically provide alternate routing for 95% of grade crossing issues.

👍 The combination of grade separation and Predictive Mobility can provide a 100% solution.

👍 LinqThingz API connects with **Navigation Cloud Providers** and evolving **Connected Vehicle Providers**.

👍 Variable Message Signage Provide solution to all road traffic.
