# McCain BACKPLATE WITH REFLECTIVE BORDERS

The McCain Backplate with Reflective Borders provides visual contrast between signal heads and enhance signal visibility for the driver. The reflective borders, through the use of retroreflective tape, provide an aesthetically pleasing and functional look while increasing traffic safety at intersections. The Federal Highway Administration approved the use of retroreflective tape after a seven-year safety study showed that the use of retroreflective backplate borders reduced total crashes at intersections by 15% to 24%.

3-Section louvered backplate

## KEY FEATURES AND BENEFITS

- Enhance signal visibility
- Boost driver awareness
- Command attention with retroreflective tape border
- Compatible with most standard signals

## PRODUCT DESCRIPTION

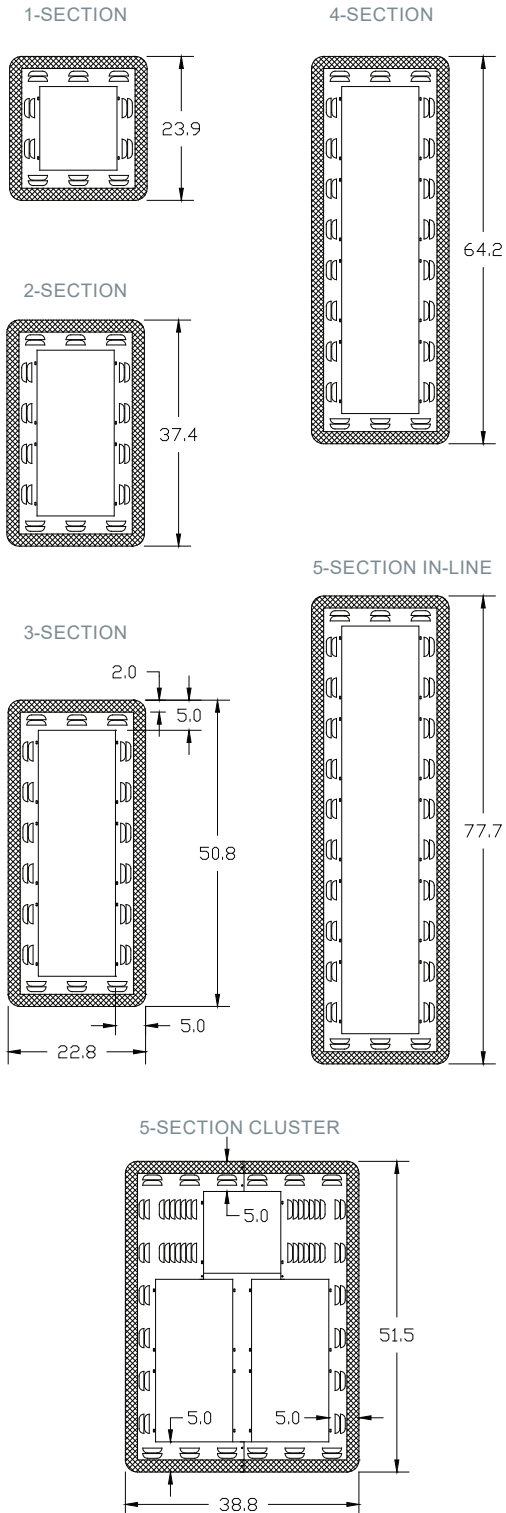

The McCain Backplate with Reflective Borders is designed for standard traffic signals and fit both 8" and 12" signal heads. The backplate is fabricated from aluminum or polycarbonate, and have five-inch borders. The backplate accommodates retroreflective tape widths of one, two, or three inches.

The McCain Backplate with Reflective Borders can be configured for one-section to five-section in-line, or five-section cluster signals. All in-line backplates are fabricated from one solid piece of aluminum or polycarbonate. The five-section cluster backplate is a three-piece design.

The retroreflective tape is designed by 3M for vertical mounting and is available in multiple options.

# McCain BACKPLATE WITH REFLECTIVE BORDERS

## BACKPLATES WITH 2" TAPE<sup>1</sup>
