SWARCO MCCAIN PEDESTRIAN SIGNAL HOUSING

12" 16" ALUMINUM POLYCARBONATE

The McCain Pedestrian Signal Housing is designed to promote pedestrian safety at intersections. Used in conjunction with standard or LED pedestrian signal modules, the McCain Pedestrian Signal Housing exceeds standards and offers a low maintenance and durable housing solution. The McCain Pedestrian Signal Housing is available in 12" and 16" form factors with a variety of configurations, including die cast aluminum or injection molded polycarbonate construction.

Federal Yellow

Black

KEY BENEFITS

- Highly customizable; including a variety of sizes, fabrication, mounting, and visor options
- Offers rugged aluminum or polycarbonate construction
- Accommodates standard symbol or word pedestrian signal modules including LED
- Increases visibility and impact protection¹

PRODUCT DESCRIPTION

The door on the McCain Pedestrian Signal Housing is equipped with door-hinge hardware that is removable, reversible, or permanently attached.

The door is attached with stainless steel detent-type clevis or roll pins and eye bolt/wing nut assemblies. Two equally spaced mounting lugs, integrally cast into the sides of the 12" and the top and bottom of the 16", allow the doors to hinge from either direction. When clevis pins are used, the door and eye bolt assemblies can be removed and rotated without the use of any tools.

All interior mounting locations on the 16" housing are symmetrically positioned, allowing the rotation of components when using the bidirectional McCain Clamshell Mount to mount to the right or left side.

McCAIN PEDESTRIAN SIGNAL HOUSING
